

NAVAJO TROUBLES NOW AT END ON RESERVATION

TROOPERS RETURN TO WINGATE AFTER MONTH AT FORT DEFIANCE

L. B. Gould, the enterprising young editor of the Gallup Republican, was in the city yesterday looking after business matters. Mr. Gould returned to Gallup last night. He says that the western town is rather quiet just now, as is usual at this season, but that the prospects of the town were never better.

Mr. Gould tells of the return to Fort Wingate Sunday of the half troop of cavalry which for several weeks has been in the vicinity of Fort Defiance in the Navajo reservation in connection with the recent troubles with the Navajos in that section, following the arrest and detention by the Indians of Indian Agent Perry for several days. There is little inclination to give out details of the recent troubles on the part of the authorities, either civil or military, and few details are known, but it is believed that for a time at least the situation was more threatening than has been generally known.

The return of the cavalrymen points to the final ending of the disturbances.

NAVIGATION OF THE YUKON.
Scheme to Keep Floating Ice From Entering River.

Ottawa, Dec. 12.—Representations are being made to the department of public works by persons interested in the navigation of the Yukon river with the object of lengthening the season for steamers. The proposal is that the department shall construct booms at the mouths of the rivers tributary to the Yukon, and thus keep the floating ice out of the stream. Steamers plying on the river carried 20,325 tons of freight into the Yukon during the season just closed, and 5,000 to Alaskan points.

He proposed to leave Seattle soon after the first of January, and to travel over the country with the dog team wherever there is sufficient snow to make the sledding possible. It is planned to reach New York for the opening of the annual sportsmen's show the latter part of March.

BLOOD CELLS.

Man is a millionaire many times over in the possession of blood cells. Woman is not quite so rich, for scientists have proven that the normal number of red blood cells in adult men is five million; in women four and a half million, to the square millimeter.

The normal cell is not absolutely round in health, but, in disease, becomes extremely irregular in shape. Every one can be in perfect health and possess the millions of rich red blood corpuscles if they only know how to go about it. Dr. R. V. Pierce, consulting physician to the Invalids Hotel and Surgical Institute, at Buffalo, N. Y., advises every man and woman to prepare for a long life by observing nature's laws. In the first place, if your digestion is faulty, and the food you eat is not taken up by the blood and assimilated properly, you need a tonic and digestive corrector, something that will increase the red blood corpuscles; he believes in going about this in nature's own way. Years ago, in his active practice, he found that an alterative extract of certain herbs and roots, put up without the use of alcohol, would put the liver, lungs and heart into fuller and more complete action. This medicine he called Dr. Pierce's Golden Medical Discovery. By assisting the food eaten, it nourishes the blood and, instead of the ill-shaped corpuscles, the person's blood takes on a rich red color and the corpuscles are more nearly round. Weakness is only the cry of the starved nerves for food, and when the nerves are fed on rich red blood the person loses those irritable feelings, sleeps well at night and feels refreshed in the morning.

KNOWLEDGE IS POWER.

If you want to know about your body, read Dr. Pierce's Common Sense Medical Adviser, which can be had for the cost of mailing, 37 cents in one-cent stamps for the cloth-bound book, or 21 stamps for the paper-covered volume. 108 pages. Address Dr. R. V. Pierce, Buffalo, N. Y.
